About Campbell Construction Inc.

Campbell Construction is a full service Design-Build General Contractor, Construction Manager, Construction Service, and Facilities Maintenance company with offices in Wooster and Wadsworth, Ohio. We have been offering design, engineering, general contracting, construction management, construction services, and facilities maintenance since 1953. We offer a straightforward approach to implementing cost-effective solutions for construction projects and treat each project as if it were our own.

Campbell Construction Inc., focuses on providing innovative services, while continuously striving to find cost-effective alternative solutions. Our approach to projects provides up-to-date detailed information that is tailored to each project, which includes cost, schedule, design, quality and safety.

Campbell Construction Inc. specializes in minimizing cost and schedule to maximize value to each of our customers.

Clients

Campbell has a wide variety of clients, and services many industry sectors including, Warehousing/ Distribution, Medical, Manufacturing, Restaurants, Hospitality, Education, Financial Institutions, Public Facilities, etc. We understand the challenges and uniqueness of each of our clients and strive to excel in their expectations in every step of the design and construction process.

What we do

Campbell offers the following services to its clients:

Architectural Services

Design-Build Services

Construction Management Services

Construction Services which includes: Utility installation, Excavation, Concrete, Masonry, Carpentry, and Steel Erection

Facility Design and Engineering

Machine/Pit Foundation Design and Engineering

Facilities Maintenance

Roofing

How we do Business

At Campbell, our philosophy is to operate with integrity in every aspect of our business. People, partnership and performance are at the heart of what we do. Maintaining trust with our customers, subcontractors, suppliers and employees requires a commitment to conduct business in a sociably responsible and ethical manner. Our efforts in safety, reliability, quality, efficiency, and community, speak to this business philosophy. In each of these areas, it is our daily practice to achieve the spirit of partnership and expert performance.

Values

Our company's foundation is built on our values, which distinguish us and guide our actions. These values are: Integrity, Trust, Diversity, Ingenuity, Partnership, Performance, Quality, and Protecting People and the Environment.

Operational Excellence

We have a systematic approach to the management of safety, quality, health, environment, reliability and production. Our vision is to be recognized and admired by our industry and the communities in which we work. The single largest factor for success in operational excellence is leadership. Leaders are accountable not only for getting results, but getting results with integrity. Leaders at every level are expected to foster a culture grounded in operational excellence which includes:

1. Security of Personnel, Clients, Assets and Job Sites
2. Safe Operations
3. Reliability and Efficiency
4. Environmental Stewardship
5. Incident Investigation
6. Community Awareness and Outreach
7. Compliance Assurance
8. Top Level Production

Community Service

Campbell believes in serving the communities in which it works. We understand that a strong and vibrant community is beneficial to all. The following is a list of some of the organizations and causes that Campbell has supported over the years:

Akron-Canton Regional Foodbank
Wadsworth Rotary
Wooster Rotary
Wooster Kiwanis
Hospice and Palliative Care of Greater Wayne County
Goodwill
Medina County Economic Development Corporation
Wayne County Historical Society
Junior Achievement
Ducks Unlimited
Wadsworth Chamber of Commerce

Canton Regional Chamber of Commerce
Wooster Area Chamber of Commerce
Orrville Chamber of Commerce
Village Network
Red Cross
Young Professionals
Greater Akron Chamber of Commerce
United Way
Wayne Economic Development Council
Wayne Co. Humane Society
Portage Development Board

Awards and Accolades

Over the years Campbell has been recognized on many occasions for its business practices. A few examples of this would include the following:

Wooster Chamber Business of the Year 2009

Recognized on numerous occasions by Metal Construction News as one of the top 100 builders

ABC Associated Builders and Contractors STEP Award (Safety Training and Evaluation Process)

Wooster Chamber of Commerce Business Person of the Year

Recognized on numerous occasions as High Performance Builder by Butler Manufacturing

Recognized by Diebold Inc. as outstanding supplier of services

Recognized by Cuyahoga Falls General Hospital for outstanding service

Recognized by Butler Manufacturing for Builder of the Year 2008

Industry Affiliations

USGBC – United States Green Building Council

About Us

Years in Business

Campbell Construction Inc. started in business in 1953.

Employee Breakdown

Field Staff – 40

Management/Administrative Staff - 19

Technical Qualifications

- Campbell Project Managers and Project Superintendents are Certified Professional Constructors (CPC) as designated by the American Institute of Constructors.
- All Field employees have a 10 hour OSHA Certification
- All Field Management employees have a 30 Hour OSHA Certification
- LEED Accredited Professional on staff
- Storm Water Certified
- State Certified water line installer
- Certified and Licensed in the state of Ohio as a General Contractor
- Ohio Department of Transportation (ODOT) approved contractor
- On-Staff Registered Architect
- On-Staff Civil/Structural Engineer
- ACI Certified Concrete Field Testing Technician

Pre-Engineered Building Specialist

Campbell Construction has been erecting pre-engineered metal building systems since 1986. We are one of the region's largest pre-engineered metal building constructors. We are a Butler Manufacturing Career Builder.

A steel building system offers significant cost and performance advantages over conventional construction methods. With systems construction, each part is engineered and designed to assemble together. So, a steel building system can be built with greater speed and precision than is generally possible using conventional methods.

The advantages of steel-systems construction and metal roof systems include:

- Faster installation
- Lower lifecycle costs for greater return on investment
- Compelling sustainability attributes
- Virtually unlimited design flexibility

Qualifications

John A. Campbell - President & CEO

John Campbell has provided the vision and leadership to grow Campbell Construction into one of Northeast Ohio's leading Design-Build construction companies. He has been at the helm of leadership since he purchased the company from his father in 1980 and has grown the company to approximately 60 employees with annual sales of \$20 million.

Joe Campbell, CPC (Certified Professional Constructor) - Vice President of Construction Management

Joe Campbell has been with the company since 1993. He holds a degree in Construction Engineering Technology from the University of Akron. He is a Certified Professional Constructor as designated by the American Institute of Constructors and participates in all aspects of the company and currently heads the company's safety program and is actively involved in Green construction.

Stephanie Campbell - Controller

Stephanie Campbell has been with the company since 2005. She holds a degree in Business Management and an MBA both from Ashland University. She is responsible for the bookkeeping and financial management of the company.

Paul Streb - Vice President of Construction Services

Paul Streb has been with the company since 1981 and has served in many positions throughout his tenure. He currently oversees all construction activities for Campbell.

Jeff Stevenson - V.P. of Business Development

Jeff Stevenson is responsible for all aspects of sales, marketing, information technology and human resources at Campbell Construction and has been with the firm since 1989. He holds a degree in Business Administration and Marketing from the University of Akron and serves as a relationship manager for key accounts. He is an experienced professional who assists with the overall planning and direction of the corporation.

David A. Aulger - Architect - Vice President of Design

David Aulger is responsible for all Architectural and design services at Campbell Construction and has been with the firm since 2013. David holds a Bachelor of Architecture and a Bachelor of Science of Architecture from Kent State University. He holds an Architecture license in the State of Ohio (#12527). Dave has 20 years of experience in the architectural field and has participated in the design of a wide variety of commercial and industrial facilities.

Bill Sliwinski, P.E., LEED AP - Engineer

Bill Sliwinski is responsible for all aspects of engineering and design at Campbell Construction. Bill has been with the company since 1999. He holds a Degree in Civil Engineering from The Ohio State University. He holds a Professional Engineering (PE) license in the State of Ohio (#E-63683) and is a Certified Professional in Erosion and Sediment Control (CPESC). He is a past president of the Structural Engineering Association of Ohio. He is also a LEED Accredited professional.

Qualifications

Mark Streb, CPC (Certified Professional Constructor) - Project Superintendent

Mark Streb has been with Campbell Construction since 1982. Mark started his career in the field participating in all construction trades. Through his leadership he advanced through the management ranks to his current position. Mark has been involved with and led some of Campbell's most complex projects which would include many projects in the medical and institutional sectors. He is a Certified Professional Constructor as designated by the American Institute of Constructors.

Tim Wolff, CPC (Certified Professional Constructor) - Project Superintendent

Tim Wolff has been with Campbell Construction since 1987. Tim started in the field working on the carpentry crew and has advanced through the ranks to his current position. He is a Certified Professional Constructor as designated by the American Institute of Constructors.

Tim Carr - Project Superintendent

Tim Carr has been with Campbell Construction since 1987. Tim started in the field working on the concrete crew and has advanced through the ranks to his current position.

Rich Hauenstein - Project Manager

Rich Hauenstein has been with the company since 1981. Rich has worked in the construction industry since 1978 and holds a degree in Civil Construction Technology from Stark State College.

Dave Kostohryz, CPC (Certified Professional Constructor) - Project Manager

Dave Kostohryz has been with Campbell Construction since 2001. Dave has worked in the construction industry since 1998. He holds a degree in Construction Management from OSU/ATI and is a Certified Professional Constructor as designated by the American Institute of Constructors.

Matt Moretti, CPC (Certified Professional Constructor) - Project Manager

Matt Moretti has been with Campbell Construction since 1986 and has over 25 years of experience in the construction industry. Matt started in the field working on the steel erection crew and has advanced through the ranks to his current position. Matt also serves on the Dodge Data and Analytics Contractor Panel. He is a Certified Professional Constructor as designated by the American Institute of Constructors.

Ryan Rice - Safety and Training Coordinator

Ryan Rice started with Campbell Construction in 2019 as our Safety and Training Coordinator and has been working in construction safety since 2014. He currently holds a 10-hour and 30-hour OSHA certification.

Jeff Sayers, CPC (Certified Professional Constructor) - Service Manager

Jeff Sayers has been with Campbell Construction since 2002. Jeff has worked in the construction industry since 1993. He holds a Bachelor of Science in Agriculture from The Ohio State University and is a Certified Professional Constructor as designated by the American Institute of Constructors.

Areas of Expertise

CAMPBELL CONSTRUCTION offers a complete set of professional services in the areas of Civil Engineering, Construction Management, Construction Services, Facilities Maintenance, and Design-Build Architectural Services to fit each client's needs.

Civil Engineering

- Site engineering
- Structural engineering
- Machinery foundation and pit design

Construction Management

- Project Management
- Design and scope review
- Constructability review
- Cost Control and Job Costing
- Cost Estimating and Budget Evaluation
- Scheduling and Monitoring
- Quality Assurance and Quality Control
- Bid Package Preparation and Evaluation

Construction Services

- Excavation
- Utility Installation
- Concrete
- Carpentry
- Masonry
- Steel Erection
- Pre-Engineered Construction

Facilities Maintenance

- Roofing repair and replacement
- Concrete repair and replacement
- Masonry repair and replacement
- Parking lot repair and replacement
- Foundations and pits

Design-Build Architectural Services

- Preliminary/conceptual design
- Estimating Services
- Construction drawings
- Permit Acquisition
- Project Management
- Complete Turn-key Service

What Is a Self-Performing Green Construction Company?

Campbell Construction is a builder, not a broker of construction services. Selecting us means you have a true builder on your team and on site, providing valuable input on the most complex green commercial construction projects.

The Campbell Team is on the forefront of sustainable construction practices and technologies, applying knowledge gained through experience. Typically green building construction provides financial benefits exceeding the costs. Helping clients realize this cost savings, while improving employee productivity and benefiting the environment, is what Campbell is all about.

LEED Accredited Professional on staff

William D. Sliwinski P.E., LEED AP

Campbell Construction provides the tools and encourages its managers to obtain the LEED Accredited Professional certification.

USGBC Member

Campbell Construction has been a member of the U. S. Green Building Council since 2008.

Recycle

Campbell Construction recycles its construction waste during the Green construction process. All construction waste is commingled in a designated waste receptacle. The receptacle is sent to a recycling facility to be sorted, and around 90% of our construction waste on LEED sites is diverted from landfills.

Purchase of Materials

Campbell Construction purchases materials that contain high percentages of recycled content when applicable, and we also try to purchase materials that are regionally harvested and manufactured. We do this to reduce the strain on natural resources that harvesting raw materials and transporting long distances cause.

Design

Campbell Construction designs buildings to be efficient and minimize material waste. We utilize recycled materials in our designs such as structural steel and metal studs. We also minimize site disturbance by orienting our buildings to fit the existing grades as best as possible and by setting construction limits that do not extend beyond the necessary space needed to construct the project.

Green isn't a new concept for Campbell. We are a leader in green building construction. As a green construction company, we have been practicing high performance building long before going green or sustainable became mainstream. Campbell has become a leading green construction company by employing craftspeople trained and educated in green commercial construction.

Our Role in Green Commercial Construction

As a green construction company, Campbell believes every project is an opportunity to evaluate and potentially reduce environmental impact.

Campbell Construction places a high value on safety. We aim to protect our Associates, Clients, Client's Customers/ Staff, and Subcontractors. We also strive to reduce injuries and to decrease work-time loss.

Ohio Bureau of Worker's Compensation Experience Modifier Rating (EMR)

.50

Quarterly Safety Meeting

Campbell Construction conducts a safety meeting each quarter for our employees. In these meetings the employees are given updates concerning our safety program such as our current EMR, any lost time injuries we have had, and what has been seen during jobsite inspections.

Campbell Construction provides safety training at each quarterly meeting on a range of topics. Some examples of the training topics provided are PPE, Fall Protection, Electrical Safety, Trenching and Excavation Safety, Hazardous Communication, and many others. The training is performed either by Campbell Construction or by other professionals that specialize in the field being trained.

Safety Committee

Campbell Construction has a Safety Committee which meets on a quarterly basis and consists of management, field supervision, and trades people. The purpose of this committee is to discuss ways to improve our safety practices and give all stakeholders a say in our safety program.

Weekly Toolbox Talks

Each week Campbell Construction's Field Managers conduct Toolbox Talk safety training with the employees they supervise. The topics of the Toolbox Talks are similar to the safety training topics covered in the quarterly meeting, and are intended to be a refresher that keeps everyone thinking about their work environment and being safe.

OSHA 10

All Campbell Construction field employees have completed the 10-hour OSHA course in Construction Safety and Health.

OSHA 30

All Campbell Construction managers have completed the 30-hour OSHA course in Construction Safety and Health.

S.T.E.P. Award

Campbell Construction has received the Gold Level S.T.E.P. Award the past 10 years from ABC, Associated Builders and Contractors, Inc. S.T.E.P. stands for Safety Training Evaluation Process, and it provides us with a way to measure our safety program's progress, seek ways to improve it and benchmark our performance with our peers.

Group Rated by BWC

Campbell Construction is group rated by BWC. This means we are in an insurance group with other businesses similar to ours, which allows us to experience considerable savings on our Worker's Compensation Insurance. To be part of a group we must maintain a positive safety culture and keep severe and lost time injuries below industry minimums.

DFWP

Campbell Construction is a Drug Free Workplace, and all of our employees are trained on the effects and warning signs of drug and alcohol abuse.

Job Site Inspections

Campbell Construction performs job site safety inspections on a regular basis. These inspections cover 18 critical points that insure we comply with our safety policy and the OSHA Standard.

PPE and Fall Protection

All Campbell Construction Employees are provided with all the necessary PPE for any situation, and each employee is issued a hard hat, fall protection harness and lanyard at their time of hire.
